A true internationalist, Kirsten studied in New Zealand and Korea before pursuing her law degree from Rutgers University School of Law, where she received a Dean's Academic Excellence Scholarship and was on the Dean's List.

Representative Matters

- Obtained a successful settlement on behalf of our client, a technology device company, in connection with a lawsuit pending in South Korea. The matter involved claims that our client's fuel gauge chips were defective, and as a result, the plaintiff allegedly incurred substantial damages. During the lawsuit, we were able to successfully settle the claims asserted.
- Successfully settled a case on behalf of an internet technology company in a dispute regarding an enterprise resource planning software that was customized and created by the defendant, another software company, and a non-exclusive license agreement to use the software belonging to our client.
- Successfully represented a technology consulting services company in a matter submitted to the International Center for Dispute Resolution. The dispute arose out of a Master Service Agreement between the parties, to which our client agreed to provide certain information technology and outsourcing services. The claim alleged that our client was not able to solve the reported defects reported with the codes within the software and access to the source code repository, which was claimed to be a trade secret.
